

Keng's Landing

Guest Book and Property Guide

A peaceful country retreat in Fairfield, Texas.

This is our family property and a place that we love. We hope you enjoy it as much as we do!

Quick Info

Welcome to the Property

Escape to a quiet country retreat on several wooded acres just outside Fairfield, Texas. This is a place to slow down, enjoy the outdoors, and rest.

As you arrive, you will see a red gate at the front of the property. The guest entrance is beside it near the home with the red roof and the gravel driveway leading to the carport.

You may park anywhere in the gravel area or under the carport. Motion lights will come on automatically in the evening, and there is additional lighting available in the carport if needed.

The home has a long accessible ramp leading to the front porch. Please mind the step as you enter through the front door.

What You'll Find Here

The layout offers privacy and comfort, with the bedrooms and bathrooms on opposite sides of the home.

The property includes a large gated backyard, Smart TVs in every room, a washer and dryer, a toddler bed, covered parking, high-speed Starlink internet, and a peaceful desk area overlooking the backyard and pond.

This is a wonderful spot for couples, small families, remote work, wildlife watching, and relaxing evenings in the hot tub.

WiFi and Working Remotely

Starlink internet is provided for guests. It's very fast! If you have any issues please let us know and we will call Elon to get it fixed. In all seriousness, we have not had any issues but it's possible that certain weather could cause temporary outages.

There is a quiet workspace overlooking the backyard and pond, complete with a desk, monitor, and direct HDMI connection for guests who need to work during their stay.

Entertainment and Smart TVs

Each room has a Smart TV with access to popular streaming apps including Netflix, Hulu, and Amazon Prime.

You can log in to your own streaming accounts. Please remember to log out before checkout.

To cast from your phone or laptop, connect to the same Starlink WiFi network and use the built-in casting feature on the TV.

Kitchen and Appliances

The kitchen is fully equipped with a stove, oven, microwave, refrigerator, and dishwasher.

A coffee maker is available on the counter. Filters, stevia, and a small supply of coffee are provided.

Basic cooking essentials such as oil, salt, pepper, and common spices are stocked for your convenience.

If you use the oven or stovetop, please clean up afterward and ensure all burners are turned off.

A filtered water dispenser is available in the kitchen for drinking and coffee. It provides clean, great-tasting filtered water — one of those small touches that makes a stay feel a little more like home. If you'd like hot or cold water, there are two switches on the back of the dispenser to turn those features on. Feel free to use them during your stay.

Climate Control

The home has central air conditioning controlled by a thermostat by the front entrance. Please set it to a comfortable temperature and avoid setting it below 68°F in summer.

Propane Fireplace (Living Room): The propane supply valve is at the bottom of the unit. To light it: turn the knob to Pilot mode, hold the knob down for about 5 seconds, then click the starter button while still holding. Once the pilot catches, hold a few more seconds, release, and turn the knob to a higher setting. If it doesn't catch, repeat the process. The 1–5 dial is temperature-based: the fireplace turns on and off automatically based on room temperature. We recommend setting it between 2–3. Setting 5 runs continuously and pumps out a lot of heat. Please turn it off before going to bed or leaving the property.

Electric Fireplaces (Bedrooms): Plug the unit in — you may hear a beep confirming power. Look for a small metal grate on the top-right of the unit. Under that grate is the power button — press it to turn on. There is a second button for High/Low heat. If the unit seems unresponsive, look for a reset button on the back or underside and press it, then try the power button again.

Ceiling fans are available in the bedrooms and living room to help with airflow. Carbon monoxide and smoke detectors are installed throughout the house for safety.

Outdoor Lighting

The main power switch for the back porch is on the pine wall behind the TV inside the house. Flip it on and the bug zappers will come on automatically.

For the patio string lights, there are pull-chain switches outside on the porch. Turn on the main switch inside first, then use the pull switches to control individual patio lights.

House Rules

Please treat the home, land, and surrounding environment with care and respect.

This is a quiet rural area. Parties, large gatherings, or disruptive behavior are not permitted.

Only guests listed on the reservation are permitted to stay overnight unless approved in advance.

Maximum occupancy is 4 guests unless approved ahead of time.

Smoking is not permitted inside the home or on the front or back porch.

The carport storage areas and shed are reserved for owner use and are not accessible to guests.

If anything is damaged or not working properly, please contact the host promptly so it can be addressed.

Pets are not permitted unless approved in advance by the host.

Please keep noise to a minimum between 10:00 PM and 7:00 AM out of respect for the peaceful setting.

Hydrotherapy Jacuzzi

This isn't a standard hot tub — it's a premium hydrotherapy massage jacuzzi. Five dedicated seats across four distinct zones, three independent jet systems, and individual throttle controls per zone. Take your time with it.

Seating: The love seat (2 people) and front single seat share one jet zone with a sideways throttle knob near the love seat to direct flow between them — we keep it in the middle. There are also foot jets between these two seats. The therapy seat (across from the control panel) has its own independent zone controlled by Jets 3 (On/Off) with its own throttle — the 2nd most powerful position. The control panel seat is the deepest with the most powerful jets, its own throttle, and multiple knobs to direct individual jets exactly where you need them.

Controls: Jets 1 has High/Low toggle. Jets 2 is On/Off. Jets 3 controls the therapy seat (On/Off). Important: the Blower and Lights buttons are swapped — press "Blower" for lights, press "Lights" for the bubble feature. There are tons of switches, toggles, and dials all around the tub — explore and find your setup.

Temperature: The jacuzzi goes up to 104°F but that's intense — you'll last about 5 minutes. We recommend 100–101°F for longer sessions (you'll still want to sit on the edge to cool down). We keep it at 98°F when not in use. It heats about 2°F per hour with the lid closed, so plan ahead. If you set it too high, it takes a while to cool back down.

Before You Get In: Please rinse off before getting in — body oils, sunscreen, and lotions cause foaming and make maintenance harder. Just throw on your swimsuit, rinse in the indoor shower, and walk out. For longer stays with regular hot tub use, please add two capfuls of spa shock from the supply cabinet near the hot tub after each use. Leave the cover open and run the jets for about 10 minutes, then turn the jets off and replace the cover. This keeps body oils and lotions from making the water cloudy or stale. The Lid: A metal assist bar helps guide the cover on and off. A bench stand at the back catches the lid when you flip it up. Lift evenly from the center to avoid bending the bar (it's been repaired once). The cover has cosmetic tears on the outside but the inner foam has been resealed. No glass near the tub. Children must be supervised. Always replace the cover when done.

Laundry

A washer and dryer are available for guest use.

The laundry area is located inside the home. Detergent is provided.

Please clean the lint trap after each dryer load.

Trash and Outdoor Care

A red dumpster is located near the front entrance. Please place all trash in the dumpster so wildlife is not attracted near the house.

Trash pickup is typically on Thursday. Please avoid parking directly in front of the dumpster on that day.

Please do not leave trash bags, food waste, or loose garbage around the house, porch, or yard.

Septic-Safe Home

This property uses a septic system. Please help us protect it by following these guidelines:

Please use the toilet paper provided and only flush toilet paper.

Do not flush wipes of any kind, including those labeled flushable.

Do not flush feminine hygiene products, cotton balls, or dental floss.

Do not pour cooking grease, oil, or food scraps down any drain.

Avoid using harsh chemical cleaners such as bleach or drain openers.

When in doubt, use the trash can.

Wildlife, Pond, and Exploring

The backyard has been set up as a small wildlife habitat. It is common to see Blue Jays, Cardinals, squirrels, songbirds, turtles, frogs, deer, and other native wildlife.

You are welcome to enjoy the pond and watch for turtles. Fishing is not permitted.

- If you would like to see the turtles come up, guests may toss in small pieces of fruit such as diced apples.
- Deer are often visible near sunrise and again before sunset by the feeder outside the gate near the pond.
- Guests are welcome to walk the property and explore the wooded areas, but please be mindful of property lines and watch for sections of fallen barbed wire fencing.

Outdoor Fires

- Outdoor fires are welcome only in designated fire pit areas.
- Please use good judgment, supervise fires at all times, and fully extinguish them when finished.

Freestone County may occasionally issue burn bans during dry or windy conditions. Please check current conditions before lighting a fire. Google “Freestone County Burn Ban.” This will ensure you avoid having any uncomfortable discussions with police or concerned locals.

A Few Helpful Notes

We love animals of all kinds, but we understand that not everyone does. There is a friendly porch cat named Callie who may greet you during your stay. She is well-loved and helps keep rodents away. If you prefer space, you may gently shoo her off the porch.

Exterior security cameras monitor the entrances to the property only for safety and security.

Because this is a rural property, you may see bugs, animals, and other natural activity outside. That is part of the country experience.

The nearest hospital is Freestone Medical Center, approximately 10 minutes from the property at 125 Newman St, Fairfield, TX 75840.

Freestone County Sheriff non-emergency line: (903) 389-3236.

Cell service can be limited in rural areas. Starlink WiFi supports WiFi calling if your signal is weak.

Checkout

Checkout time is by 11:00 AM unless otherwise arranged.

Leave the beds unmade.

Used towels in the washer. You do not need to start it.

Please place dirty dishes in the dishwasher and start the dishwasher before you leave.

Please take bagged trash to the red dumpster.

Set thermostat to 80°F in summer or 67°F in winter, or back to default, before leaving.

Lights off, doors locked, and as much as possible leave the property as you found it.

We always appreciate kind feedback, ideas for improvement, and a five-star review if you feel we earned it.

Nearby Ideas

Fairfield Lake area is popular for boating, hiking, birdwatching, and scenic outdoor time.

Richland Chambers Lake is a favorite for fishing and lake days.

Cooper Farms Country Store is known for produce, peaches, and peach ice cream when in season.

Downtown Fairfield has local shops, restaurants, and small-town charm.

Corsicana, Palestine, and Mexia all make good day-trip options depending on how far you want to explore.
