

Premium Hydrotherapy Jacuzzi

Keng's Landing • 5 seats • adjustable massage zones

NO GLASS • COVER WHEN DONE

This is more than a standard hot tub. Try the different seats and throttle knobs to find your massage zone. If anything seems off, message the host.

Quick Rules

- Rinse first when possible — oils/lotion cloud water fast.
- No glass in or around the hot tub.
- Children must be supervised at all times.
- Use caution with hot water; exit if lightheaded.
- Replace and secure the cover when finished.

Seat Map

- Love seat + front single: shared jet zone.
- Sideways throttle near love seat splits flow; middle = both seats.
- Foot jets sit between the love seat and single seat.
- Therapy seat: across from panel; independent, strong massage.
- Power seat: deepest seat; strongest hydrotherapy position.

Controls

- Jets 1: main jets, High / Low.
- Jets 2: secondary jets, On / Off.
- Jet 3 / therapy seat: separate control near therapy seat — not on main panel.
- Labels are swapped: Blower = lights. Lights = bubbles / oxygenator.
- Throttle knobs adjust strength/direction; they are not on/off switches.

Temperature

- 98°F: standby temperature.
- 100–101°F: best for longer relaxing sessions.
- 103–104°F: very hot — use short sessions only.
- Heating is slow: about 2°F per hour with lid closed.
- Close the lid while heating; reopen before use.

Longer Stays: Add Shock After Each Use

1. Leave cover open when you get out.
2. Add TWO capfuls of spa shock from the supply cabinet near the hot tub.
3. Run jets with cover open for about 10 minutes.
4. Turn jets off and replace cover.
5. Wait at least 30 minutes after shock before getting back in.

Please do not add extra shock or mix chemicals. If the water looks cloudy, smells off, or you are unsure what to do, message the host and we will help.

Thank you for helping us keep the jacuzzi fresh and enjoyable.
