

Keng's Landing Hot Tub Rules

Please help us keep the jacuzzi clean, safe, and ready for the next guest.

Before You Get In

- Rinse off first. Body oils, lotions, sunscreen, and makeup make the water foam and get cloudy fast.
- No glass near the hot tub. Use plastic or metal drinkware only.
- Children must be supervised at all times.
- Use caution: hot water can make you lightheaded. Take breaks and hydrate.

Using the Tub

- Open and close the cover gently from the center so the metal assist bar does not bend.
- Jets 1 / Jets 2 / Jets 3 control different jet zones. The “Blower” and “Lights” labels are swapped: Blower = lights, Lights = bubbles.
- Always replace the cover when you are done so the tub stays warm and clean.

Longer Stays: Add Shock After Each Use

- If you are staying multiple nights and using the hot tub regularly, please add shock after each use.
- Spa shock is in the supply cabinet near the hot tub.
- When you get out, leave the cover open and add TWO capfuls of shock.
- Run the jets with the cover open for about 10 minutes.
- Then turn the jets off and replace the cover.
- Please do not add extra shock. If the water looks cloudy or smells off, message the host.

Thank You

This small step keeps the water from getting stale or cloudy from normal body oils and helps every guest enjoy the jacuzzi.
